

DiSC ASSESSMENT: WHAT IS YOUR LEADERSHIP STYLE?

Facilitated by: Sandra Abitan, Lori Gauld, Osler

DiSC is a behavioural profile assessment - one of the most commonly used tools in leadership training around the world. It is both a self-awareness tool, and a framework for working effectively with different behavioural styles. As a leader, you must collaborate with others to get work done.

Being able to recognize when & how to flex your preferred approach can help you communicate and persuade across differences, and build stronger teams. All participants will have an opportunity to complete a 10 minute online assessment and will receive a personalized report before the program.

Competency: Manages Ambiguity
